

**“So easy to operate
and move around”**

Proudly Australian

- **Designed**
- **Owned**
- **Operated**

**Fulcrum Mobile Clotheslines
are a total rethink concept for
laundry drying.**

Now it is possible to hang a “true” full load of laundry on a line and be able to move and relocate it around the outdoor space* to maintain the best drying position.

Built with powdercoated galvanised steel tube and plate and utilising galvanised and zinc plated fixings means low maintenance.

Steel core wire with PVC coating helps ensure line strength and longevity.

Each corner has a medium duty castor wheel with a brake to stop rolling on sloped surface.

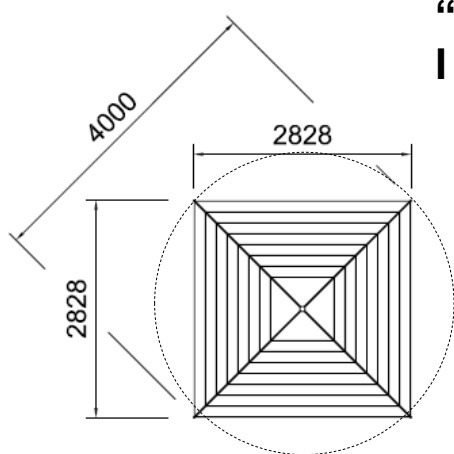

**Available in 3 line lengths:
40m, 50m or 60m
AS MUCH AS A FULL SIZE
ROTARY LINE**

*mobility with full load subject to certain surface conditions

BENEFITS TO YOU!

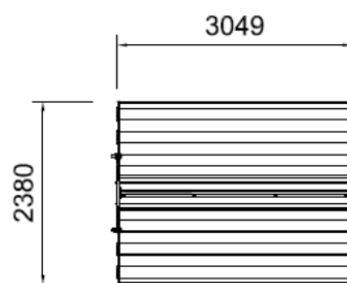

- Hang the laundry under the shade and move it out into the sun
- Reposition it if the sun cast a shadow from structures or plants
- Move it undercover rapidly if rain commences. Saves taking it all off the line
- Smaller footprint than equivalent rotary lines of same line length
- Easy to operate mechanism
- Wings can be folded down for compact storage
- Save power bills by not using the tumble dryer

“Uses so much less space than a rotary line, plus I can move it to the best position in the garden”

Equivalent Rotary Clothesline:

Line Length: 58m
In Use Footprint: **12.57m²**

Fulcrum Mobile Clothesline Model HFS60:

Line Length: 60m
In Use Footprint: **7.25m²**
